PERSONALIZED DIGITAL STARTER

MyKidsNest Forest Room

Short design direction summary

This document accompanies one personalized concept image. It is a conceptual visualization and design-direction summary, not a technical or construction document.

MYKIDSNEST

CONCEPTUAL VISUALIZATION

A - Small Bedroom

PERSONALIZED DIRECTION

Green forest direction - Limited floor space

Suggested palette

Fictional pilot input - exact Forest production artwork - not a construction plan

Customer-provided preferences

Internal reference	SYNTH-FOREST-A-001
Age range	4-6
Room information	Compact rectangular bedroom; approximate dimensions intentionally omitted
Color direction	Green forest direction
Forest elements	Meadow floor, natural tree, subtle deer presence
Existing furniture	Existing bed and wardrobe
Constraints	Limited floor space

Forest Room concept

Use the established practical Forest Room identity as the visual anchor: canopy bed, meadow-inspired floor, mushroom-light cues, restrained deer presence, natural tree, and window wall. Personalization changes the recommended emphasis, palette, and high-level styling direction; it does not claim an exact built result.

Suggested color direction

#CAD4B2	#879B72	#F2E9D8	#B9896D

High-level styling suggestions

- Keep the existing bed as the visual anchor rather than adding another large furniture piece.
- Use a restrained meadow-green floor direction and keep the center path visually open.
- Place forest character cues in one reading corner instead of distributing props across the floor.
- Use warm low-level lighting as atmosphere only; final product selection remains outside this starter scope.

Scope and limitations

Included: one personalized Forest Room concept image and this short PDF design direction summary.

Excluded: physical furniture, lighting, toys, decorations, procurement, construction or installation, detailed technical drawings, exact furniture specifications, additional perspectives, unlimited revisions, architectural advice, and safety certification.

No sleep, medical, therapeutic, behavioral, construction, or safety outcome is promised. Verify all real-world measurements, product suitability, installation, and child-safety decisions with qualified adults and professionals.
