PERSONALIZED DIGITAL STARTER

MyKidsNest Forest Room

Short design direction summary

This document accompanies one personalized concept image. It is a conceptual visualization and design-direction summary, not a technical or construction document.

MYKIDSNEST

CONCEPTUAL VISUALIZATION

B - Medium Bedroom

PERSONALIZED DIRECTION

Neutral woodland palette - Retain all major furniture

Suggested palette

Fictional pilot input - exact Forest production artwork - not a construction plan

Customer-provided preferences

Internal reference	SYNTH-FOREST-B-001
Age range	3-5
Room information	Standard medium bedroom; approximate dimensions intentionally omitted
Color direction	Neutral woodland palette
Forest elements	Woodland animals with one calm deer focal cue
Existing furniture	Existing bed, dresser, and book storage
Constraints	Retain all major furniture

Forest Room concept

Use the established practical Forest Room identity as the visual anchor: canopy bed, meadow-inspired floor, mushroom-light cues, restrained deer presence, natural tree, and window wall. Personalization changes the recommended emphasis, palette, and high-level styling direction; it does not claim an exact built result.

Suggested color direction

#E8DDC7	#B9B49D	#86917B	#C9A79B

High-level styling suggestions

- Unify existing furniture with a soft neutral textile and wall-color direction.
- Use one deer cue and a small number of woodland details to avoid visual clutter.
- Reserve the window side for the meadow atmosphere while keeping furniture positions conceptual.
- Repeat sage, warm cream, and muted blush in small accents rather than matching every object.

Scope and limitations

Included: one personalized Forest Room concept image and this short PDF design direction summary.

Excluded: physical furniture, lighting, toys, decorations, procurement, construction or installation, detailed technical drawings, exact furniture specifications, additional perspectives, unlimited revisions, architectural advice, and safety certification.

No sleep, medical, therapeutic, behavioral, construction, or safety outcome is promised. Verify all real-world measurements, product suitability, installation, and child-safety decisions with qualified adults and professionals.
